Election/Restrictions

This application is a 371 of PCT/Ep00/08268 and contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows: See table and the examples in the specification where A2 can be various groups which belong to divergent subject matter containing various hetero and non hetero groups. For example see Table J where A2 can be thiazolyl derivative and morpholine derivative. These belong to different class of compounds totally different from each other.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected (elect a specific active substance as in (a), if additional ingredients (such as in "further comprising") are desired, Examiner is requesting for listing completely defined additional ingredients. In case when additional ingredients are not specifically named or defined, claims comprising those ingredients will be classified as non-elected

invention.) Consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features .

A telephone call was made to Attorney Robert C. Faber on 8/27/03 request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sabiha Qazi whose telephone number is 703-305-3910. The examiner can normally be reached on every business day..
